

INB 建筑材料不燃性试验机

DIN EN ISO 1182 GB/T 5464

测试产品的燃烧行为，不燃性测试

产品描述

此设备对建筑材料进行测试并评估其燃烧行为。样品放置于 750°C 的加热炉内。加热炉是由支架、空气稳流器、加热器线圈、热电偶和样品夹具组成。由软件控制炉温并进行数据采集。软件控制加热炉的整个加热阶段, 还可按照标准进行计算和评估。

技术参数

| | |
|-------|---------------------------------|
| 样品： | 建筑材料 |
| 测试标准： | DIN EN ISO 1182 GB/T 5464 |
| 传感器： | 温度 |
| 电源： | 230 VAC / 1 kVA |
| 设备尺寸： | 500 x 500 x 2000 mm (W x D x H) |
| 重量： | 50 kg |

Characteristics

Testing the burning behavior of products, non-combustibility test

The device tests construction materials and assesses their burning behavior.

The specimen are lowered into an oven with a temperature of 750°C. The oven is basically composed of the rack, an air stabilizer, the heater winding, thermocouples and the specimen holder. The oven temperature and the data collection is software-controlled. The software controls the heating phase of the oven and includes calculations and evaluations of the standard. The power supply for the heater winding is given by a switching power supply unit and a pulse-width modulation. The power supply for the controller is provided by an IEC-320 AC power cordset 230 VAC (50/60 Hz).

Technical specifications
